# Special Unit

## Special Unit

They have been trained to perfection, they are at the peak of physical fitness, and they adhere to a strict code of conduct. The men of Special Unit, an elite German counter-terrorist organization, are ready to face any threat.

Each Special Unit contains 5 men who are dedicated to the task of combating terrorist threats to our society. The menace from extremist groups is growing, and in terms of intelligence as well as willingness to act - decisively and efficiently - these Special Units are perfectly equipped to deal with that threat.

Special Unit comprises 5 men who share an absolute dedication to their profession. At the same time, because they have varying characters and temperaments, there is bound to be friction bet-

ween men such as the North German aristocrat Konstantin von Brendorp and the 3rd generation Turk from the rough district of Berlin, Demir Azlan. Still, they're able to put any personal differences aside - or even use them as a driving force to spur them on to even greater feats.

The men in Special Unit have also learned the value of teamwork, of working as a unit, of pooling their resources to gain the best possible synergy effect. The importance of this approach is apparent again and again as they go into action knowing they will have to make split-second decisions and rely on their colleagues to back them up in every way.

Winding down from a job like this is virtually impossible. The families of these Special Unit officers

frequently feel neglected and unable to cope with the huge burden these men are forced to bear on a daily basis - a burden which makes them tense and unapproachable on the rare occasions they can spend time with their loved ones.

Because of the strict regulations concerning confidentiality, the Special Unit officers can't even unwind by describing the terrible experiences they have been through.

The men of the Special Unit have to risk their lives for the safety and welfare of society - often in very complex political situations - and to behave with integrity while performing their mission. The Commander of their organization makes the hard, uncomfortable decisions and then sends his men in to do the job and, if possible, get them out in one piece.

## Special Unit

The missions do sometimes raise awkward moral or philosophical questions, and this is what makes "Special Unit" particularly interesting, in addition to the excitement of gripping stories and stunning climaxes.

Thrilling stories about contemporary issues such as terror cells or attacks with biological weapons and fascinating characters stretched to the limits of their endurance... that's "Special Unit"!
