Saving the planet with "Galileo CO₂ntra"!

Although climate change is a harsh reality that is already affecting millions of people throughout the world, there is still much hope that we can reverse the damage. Everyone is capable of helping to protect our beautiful planet, and "Galileo CO₂ntra" will demonstrate exactly what we can do. The "Galileo CO₂ntra" clips that are part of the successful sciencetainment magazine provide the viewers with simple but extremely useful tips on how to save the environment by reducing energy. Which cars are the most eco-friendly - hybrids or biodiesel? What's the fastest, most cost-efficient, energy-saving way to travel? How do you drive in energy-saving mode? Various test scenarios demonstrate how to reduce CO₂. With the help of easy, day-to-day examples, "Galileo CO₂ntra" demonstrates how by making small changes in our everyday activities, such as catching the train to work instead of driving the car or using a normal toothbrush instead of an electrical one, we can save energy and thereby reduce CO₂ production. Only minute changes in our daily lifestyle are necessary, and "Galileo CO₂ntra" is here to get the ball rolling with good ideas that everyone can put to use. Tiny changes like installing a clock timer for the stove or buying an environment-friendly refrigerator make a huge difference.

Think globally, act locally!
